

# Blender

Name \_\_\_\_\_

Date \_\_\_\_\_ Period \_\_\_\_\_

*You have had an introduction to 3D modeling/animation in Blender. Now you are going to use the wealth of tutorials on the web, both written and video, to learn additional skills in blender.*

## Your Assignment:

Choose two blender tutorials of your choice and follow them from start to finish. When you have completed the tutorials, you will share your finished products with your teacher and be prepared to explain what you learned from the tutorials. See the grading rubric below for how these projects will be scored.

## Resources:

Mrs. Eitner's website has several tutorial links and resources for you to use. If you find additional sources that are helpful, please let Mrs. Eitner know so she can add them to the website.

<http://www.mrseitner.net/blender.html> You may also complete any two of the additional tutorials from 03 - 06 on <http://www.mrseitner.net/t3---assignments-1516.html>

**Due Date: Friday, April 22, 2016**

## Grading Rubric

- A - You successfully completed both tutorials from start to finish. You can share your finished project with your teacher and explain the tutorial and what you accomplished following the tutorial.
- B - You may have completed one tutorial, but not both. You are not able to clearly explain what you accomplished.
- C - You did not complete either of the tutorials. Both of them may be in progress.
- D - You may have started one tutorial but didn't get very far. You did not begin a second tutorial.
- F - You did not start either tutorial. Neither was achieved during your time spent on this project.
