

Paper Orbs

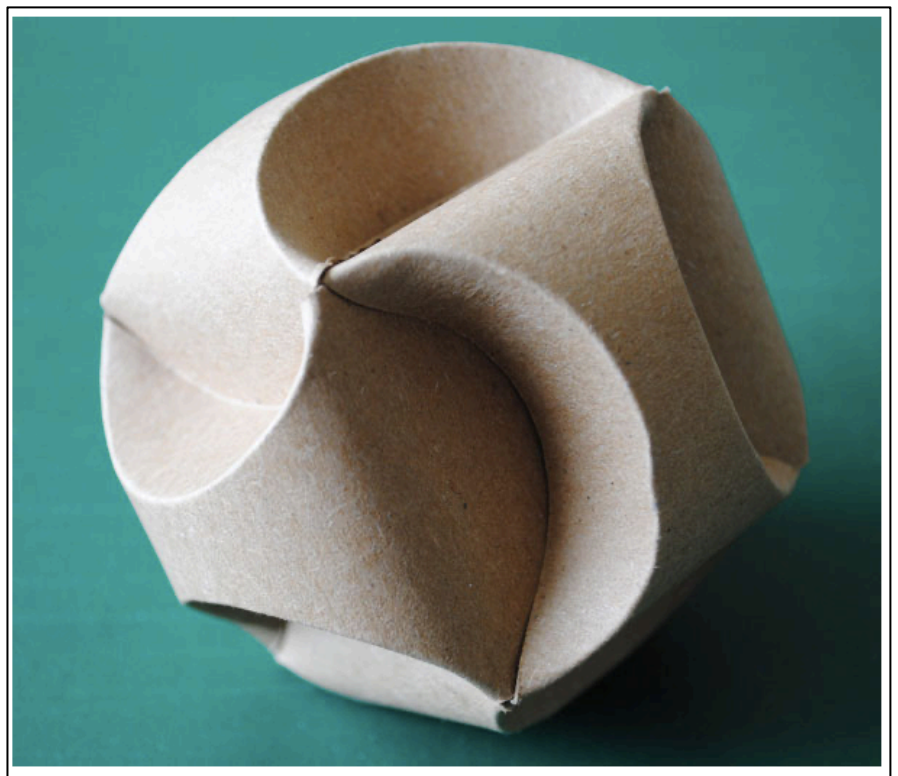

1. Deeply score the template on the dotted lines.
2. Decorate each strip with an intricate design (see above).
3. Cut out each strip.
4. Gently fold along the score lines.
5. Flatten the strips. Glue two of the strips to make circles using the dotted line to help line up the seams on each strip.
6. Combine the glued pieces as shown. Make sure that the scored areas are completely visible.
7. Thread the final strip as seen here.

8. Tape the ends together and rotate to make sure the scored areas are visible.

9. Gently push on the scored areas to activate the folds and work around the orb. Working on a side then the opposite side works best.

10. Using a thin Sharpie, neatly print your first and last name on the orb.
11. Place it in the orb bin on the front table.
